Integrated Selling Chain Management System for Insurance

Integrated Selling Chain Management (ISCM) is a complete e-enabled Automated Inquiry to Order Process System for Insurance companies and their agents.

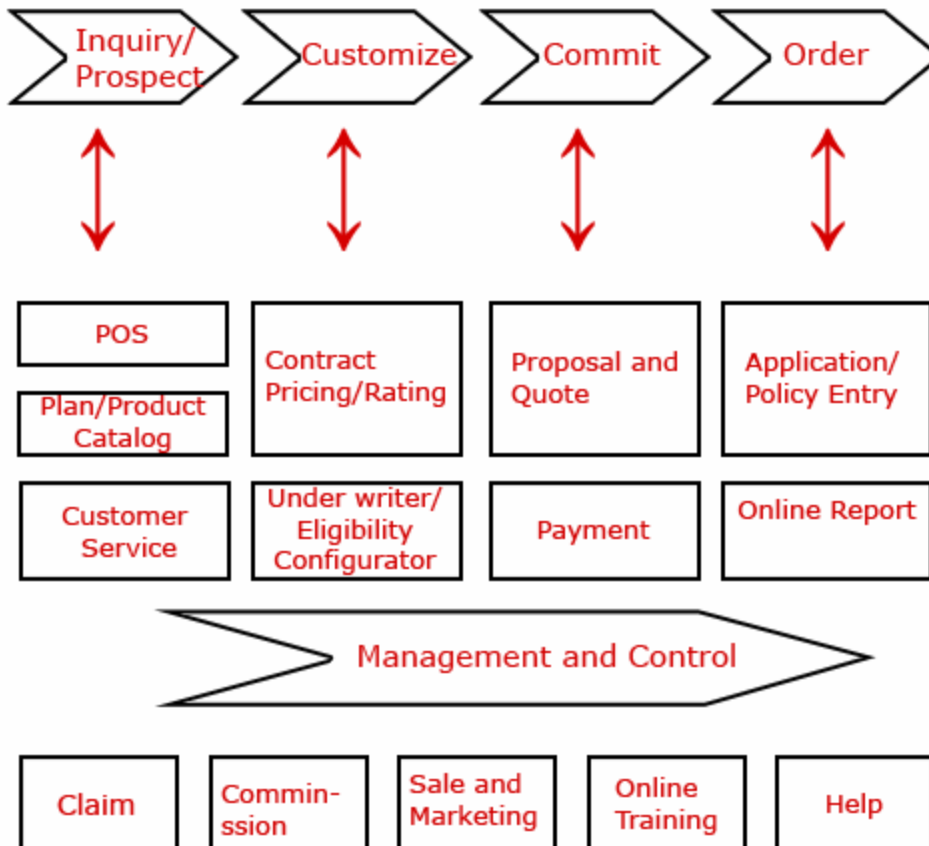

Insurance Companies & their Agents have the benefits of:

- any-time any-where business capability
- instantaneous delivery
- customized to requirement
- ease of operation

The System integrates with the existing Legacy System, thus protecting the investment already made.

ISCM comes from **CCE Software**, a leader in Enterprise Application Development and Business Process Engineering.

INTEGRATED SELLING CHAIN MANAGEMENT SYSTEM

Benefits:

- 4 Agents can conclude business on-line from anywhere
- 4 Fast, smart, accurate
- 4 Generates more business
- 4 Secured transaction
- 4 On-line customization of offer
- 4 More business per agent...
- More Agents per territory....
- More territories...
- 4 Insurance company can monitor sales activity of agent on-line
- 4 Total management control of the sales process
- 4 Protects and leverages investment on legacy systems
- 4 Captures data including those that do not translate into business. Such data are extremely valuable for data warehousing and mining
- 4 Highly customizable to company needs

Features:

- ~~///~~ On-line sales information available to Insurance Companies and their agents.
- ~~///~~ Manages available list of plans / products for Insurance Companies and their agents.
- ~~///~~ Provision for co-branding additional services.
- ~~///~~ Manages pricing and rating of products for Insurance Companies / Agents
- ~~///~~ Manages Underwriter logic
- ~~///~~ The system generates on-line proposals and quote
- ~~///~~ Supports on-line payment transactions with absolute security
- ~~///~~ Manages on-line claim requests
- ~~///~~ Manages commission accrued to the Agents and Key Business Partners
- ~~///~~ Expedites product promotion
- ~~///~~ Provides extensive on-line guidance and training to the users
- ~~///~~ Manages Agent's activities
- ~~///~~ Manages departmental activities

Run queries to search for Agent's information from data.

- ~~///~~ All Agent's data available to query
- ~~///~~ Design queries for individual, department or company.
- ~~///~~ Query all text – title and contents
- ~~///~~ Results from queries can be printed, used on-line or exported

Report generation:

- ~~///~~ Online generation of reports in pdf and htm formats for customer and agent information

The current system works in this manner:

- ~~///~~ Customer approaches an Agent with their policy requirement
- ~~///~~ The Agent accepts the required information from the customer and feeds in the details in a standalone application running in their machine
- ~~///~~ The application running in the Agent's PC generates quotes/plans and prints the application. Sometimes the Agent also quotes the rates manually from a Rate Card.
- ~~///~~ The customer opts to apply for a policy
- ~~///~~ The Agent mails the application to client
- ~~///~~ Client underwriters review the application and manually enter the details in the their system.

Execution Environment - for the Agent / KBP & Admin User
